

# JOSEPH CASTINGS EARRING PROGRAM

All of our earrings are available with a variety of earring post options. Typically, the second position of the Series indicates the type of post.

- A “**1**” in this position indicates a base setting, without a post.
- When the second position is “**3**,” the earring is made with a friction post.
- A “**4**” indicates a screw post.
- Since we offer two types of screw post, the heavier one is indicated by an “**H**” at the end of the Series name.

**R118**

**Base Setting without a post**

**R318**

**With a .030 friction post**

**R418**

**With a .030 threaded post**

**R418H**

**With a .035 threaded post**

The first letter of the earring Series indicates its shape:

“**C**” = **C**luster

“**O**” = **O**val

“**E**” = **E**merald

“**P**” = **P**ear

“**H**” = **H**ear

“**R**” = **R**ound

“**M**” = **M**arquise

“**S**” = **S**quare

“**T**” = **T**riangle
